

## Monoglass<sup>®</sup> Thermal & Acoustic Insulation Sonoglass<sup>®</sup> Premium Acoustic Treatment Spray Applied Insulations and LEED

Throughout the Construction Industry and society as a whole there is a growing emphasis on the overall LEED rating of a project. Our spray applied insulations can contribute in the following ways.

| <i>LEED Category Credit Version 2.2</i>        | <i>LEED Points Available</i>   | <i>Points Contributed</i>   |
|--|--|---|
| MR Credit 5.1 and 5.2<br>Regional Materials    | 1 – 2 points dependant on all materials being manufactured regionally within 500 miles of the project      | Location of the project will determine the points applicable. Please contact our office.<br>1 – 2 points  |
| ID Credit 1-1.4<br>Innovation & Design Process | 1 – 4 points dependant on the effectiveness and innovation of the design                                   | Monoglass / Sonoglass can contribute in a variety of ways. For potential credits as they relate to a specific project, please contact our office. |
| EO Credit 4.2 low<br>Emitting materials        | 1 point  | Monoglass / Sonoglass contains 1.74g/l (undiluted) of VOC<br>1 point contributed  |
| MR Credit 4.1 and 4.2                          | 1 – 2 points   | Monoglass / Sonoglass contains a minimum of 25% recycled material.<br>2 points contributed  |
| MR Credit 2.1<br>Construction Waste Management | 1 point  | The ability to obtain this point is dependant on the waste management practices at the project site.<br>1 point contributed                       |
| EA Credit 1:<br>Optimize Energy Performance    | 1 – 10 points dependant of percent reduction in energy based on ASHRAE/IESNA Standard 90.1-1999 Section 11 | Fiberglass naturally reduces the energy needs of a building project.<br>1 – 10 points possible.   |
| MR Credit 6:                                   | 1 point  | Sand, the main ingredient in fiberglass, is considered a rapidly renewable resource by the EPA  |
